

# Hnefatafl (The King's Table) Vikings

How to play:

You will need -

- 16 counters for the attackers.
  - 1 King counter, and his bodyguard of 8 counters.
1. The King and his guard set up in the green squares in the middle. The King starts on the castle - no other piece can go on this square!
  2. The attackers set up on the orange squares.
  3. The aim of the game is for the King to safely reach a 'SAFE!' square. The attackers are trying to capture him.
  4. Pieces move in straight lines, any number of spaces you like.
  5. Normal pieces are captured when they have two enemy pieces on either side of them. The King is only captured when surrounded on all four sides by enemies.
