F3K209: Particles, Strings and Cosmology

Postgraduate Taught MSc 2020

Essentials

Please note: 2020-21 courses may be affected by Covid-19 and are therefore subject to change due to the ongoing impact of Covid-19. Summaries of course-specific changes resulting from the impact of Covid-19 will be provided to applicants during August 2020.

For the latest information on our plans for teaching in academic year 2020/21 in light of Covid-19, please see www.durham.ac.uk/coronavirus

Course Summary

Description

This is a one year, advanced taught course. The aim of this course is to bring students, in 12 months, to the frontier of elementary particle theory. This course is intended for students who have already obtained a good first degree in either physics or mathematics, including in the latter case, courses in quantum mechanics and relativity.

The course consists of three modules: the first two are the Michaelmas and Epiphany graduate lecture courses, which are assessed by examinations in January and March. The third module is a dissertation on a topic of current research, prepared under the guidance of a supervisor with expertise in the area. We offer a wide variety of possible dissertation topics. The dissertation must be submitted by September 15th, the end of the twelve month course period.

Course Structure

The main group of lectures are given in the first two terms of the academic year (Michaelmas and Epiphany). This part of the lecture course is assessed by examinations. In each term there are two teaching periods of four weeks, with a week's break in the middle of the term in which students will be able to revise the material. Most courses are either 8 or 16 lectures in length. There are 14 lectures/week in the Michaelmas term and 14 lectures/week in Epiphany term.

Core Modules

- Introductory Field Theory
- Group Theory
- Standard Model
- General Relativity
- Quantum Electrodynamics
- Quantum Field Theory
- Conformal Field Theory
- Supersymmetry
- Anomalies
- Strong Interaction Physics
- Cosmology
- Superstrings and D-branes
- Non-Perturbative Physics
- Euclidean Field Theory
- Flavour Physics and Effective Field Theory
- Neutrinos and Astroparticle Physics
- 2d Quantum Field Theory.

Optional Modules available in previous years included:

- Differential Geometry for Physicists
- Boundaries and Defects in Integrable Field Theory
Computing for Physicists.

For further information on this course, please visit the Centre for Particle Theory website.
Admissions Process

Subject requirements, level and grade

2.1 Honours in either Physics or Mathematics.

English Language requirements

Please check requirements for your subject and level of study [www.durham.ac.uk/learningandteaching.handbook/1/3/3/].

<tbody>
<tr>
<td>EU Student</td>
<td>£9,000.00 per year</td>
</tr>
<tr>
<td>Home Student</td>
<td>£9,000.00 per year</td>
</tr>
<tr>
<td>Island Student</td>
<td>£9,000.00 per year</td>
</tr>
<tr>
<td>International non-EU Student</td>
<td>£22,000.00 per year</td>
</tr>
</tbody>
</table>

The tuition fees shown are for one complete academic year of full time study, are set according to the academic year of entry, and remain the same throughout the duration of the programme for that cohort (unless otherwise stated).

Please also check costs for colleges and accommodation (www.durham.ac.uk/postgraduate/accommodation/costs/).

Department Information

Department of Mathematical Sciences

Overview

The Department of Mathematical Sciences is one of the leading research units in the country, with interests in a wide range of areas in pure mathematics, applied mathematics and theoretical physics, as well as statistics and probability. The Department has excellent facilities for postgraduate studies. All research students have their own workspace with a network-linked computer. We also offer many research seminar series, in which you can actively participate. One measure of the vibrancy of our research is the number of postgraduate students we attract.

Ranking

 Ranked joint 1st in the UK for Internationally Excellent and World-Leading research impact in REF 2014.
