Course Summary

Description

Palaeopathology is the study of past disease in human remains; it is a sub-discipline of bioarchaeology (the study of human remains from archaeological sites). This lecture, seminar and laboratory-based MSc equips you with the theoretical and practical skills and knowledge to study and interpret data collected from human remains. The emphasis is on health and well-being using a multidisciplinary approach, linking biological evidence for disease with cultural data (the bioarchaeological approach). This course is unique in the world and it takes a holistic view of disease, as seen in a clinical context today, and will prepare you for undertaking significant research projects in this subject, or working in contract/commercial archaeology, and many other fields. It is aimed at graduates mainly in archaeology and anthropology with or without past experience or knowledge in this field, and for those who aspire to continue on to PhD or work in contract archaeology. However, past students have come from a variety of subject backgrounds, and destination data illustrates a wide range of employers take these students.

Course Structure

Two taught modules in the Epiphany term (Research and Study Skills in Archaeological Science and Identification and Analysis of the Normal Human Skeleton), and two taught modules in Michaelmas term (Palaeopathology: Theory and Method; Themes in Palaeopathology), with the double module dissertation over Easter term and the summer (submitted early September).

Core Modules

- Research and Study Skills in Archaeological Science
- Identification and Analysis of the Normal Human Skeleton
- Palaeopathology: Theory and Method
- Themes in Palaeopathology
- Dissertation (double module).

Admissions Process

Subject requirements, level and grade

A minimum of an upper second-class (2:1) degree or equivalent; GPA of 3.3 or above.

Reference requirements

Two satisfactory academic references are required

Application deadlines

There is no specific deadline for applications. Applications for any given academic year must be received before the start of that academic year (i.e. applications for the 2020/21 academic year must be received before October 2020).

Tuition fee deposit

All self-financing overseas students are required to pay a £1000 tuition fee deposit if an offer from the Department of Archaeology is accepted. The tuition fee deposit is paid before the University issues a Confirmation of Acceptance to Study (CAS) number, which is required in order to apply for a visa. £500 deposit is also payable by Home/EU applicants if an offer of a place from the Department of Archaeology is accepted.

English Language requirements

Please check requirements for your subject and level of study (www.durham.ac.uk/learningandteaching.handbook/1/3/3/).

Career Opportunities

Department of Archaeology

Many of our postgraduates move into an academic career, either teaching or by taking up post-doctoral research positions in universities. Others join museums or national and regional heritage organisations. Some work in professional archaeology, in national or local planning departments, while others elect to use their analytical and presentation skills to gain positions in industry, commerce and government.

For further information on career options and employability, including the results of the Destination of Leavers survey, student and employer testimonials and details of work experience and study abroad opportunities, please visit our employability web pages (www.durham.ac.uk/archaeology/postgraduate/employability).

Department Information

Department of Archaeology

Overview

Our internationally respected research expertise will provide you with some of the best resources available for archaeological research. We have one of only three commercial archaeology units in the UK based in a university department here at Durham. You will be able to work with experts in the field and will have access to state-of-the-art laboratories and specialised facilities. Among the best in the world, our MA programmes – including Museum and Artefact Studies, International Cultural Heritage Management, and Conservation of Archaeological and Museum Objects – offer strong professional and vocational training. The MSc in Bioarchaeology and research strands of the MA in Archaeology offer ideal preparation for research careers and specialisation. Our unique MSc in Palaeopathology attracts students globally with academic and professional goals.
